1.Introduction

In this assignment, we, my group members and I were asked to choose a type of project with a project name. We decided to name our project name as watchout.com since it is online streaming site where we can download and upload movies as well.

In order to submit our continuous assignment, we divided the work into 4 groups. Each member had their own specific task to do. I decided to draw Use case and Class diagram as shown in the figure below –

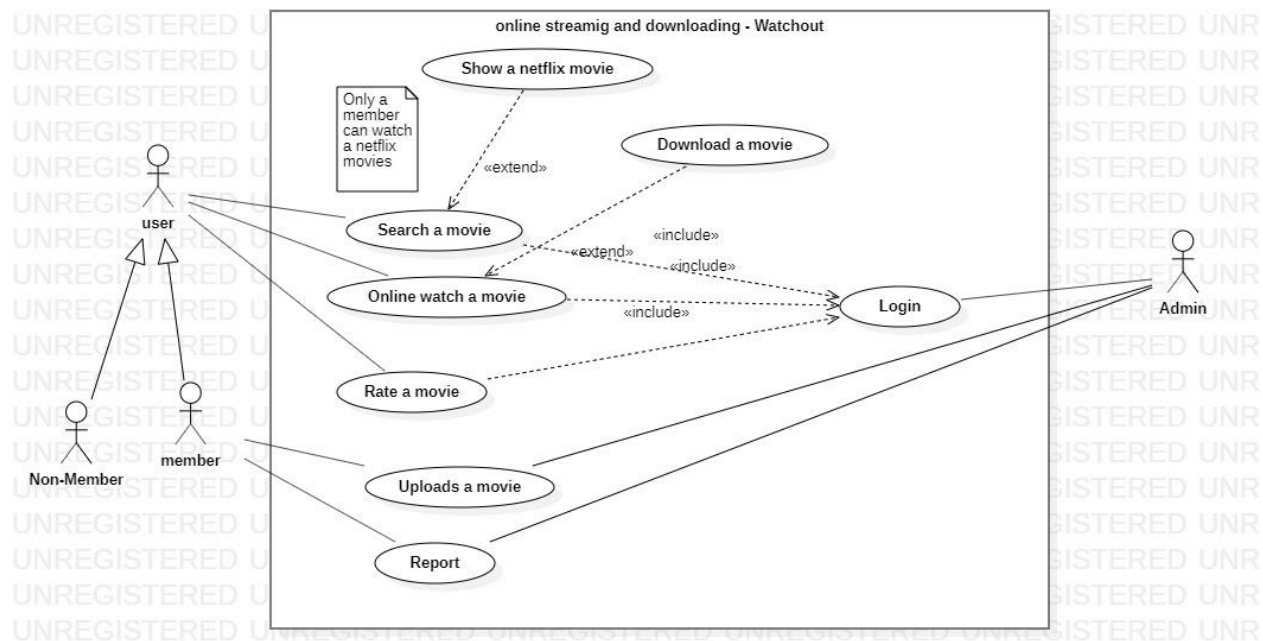

Figure 1 Use case diagram

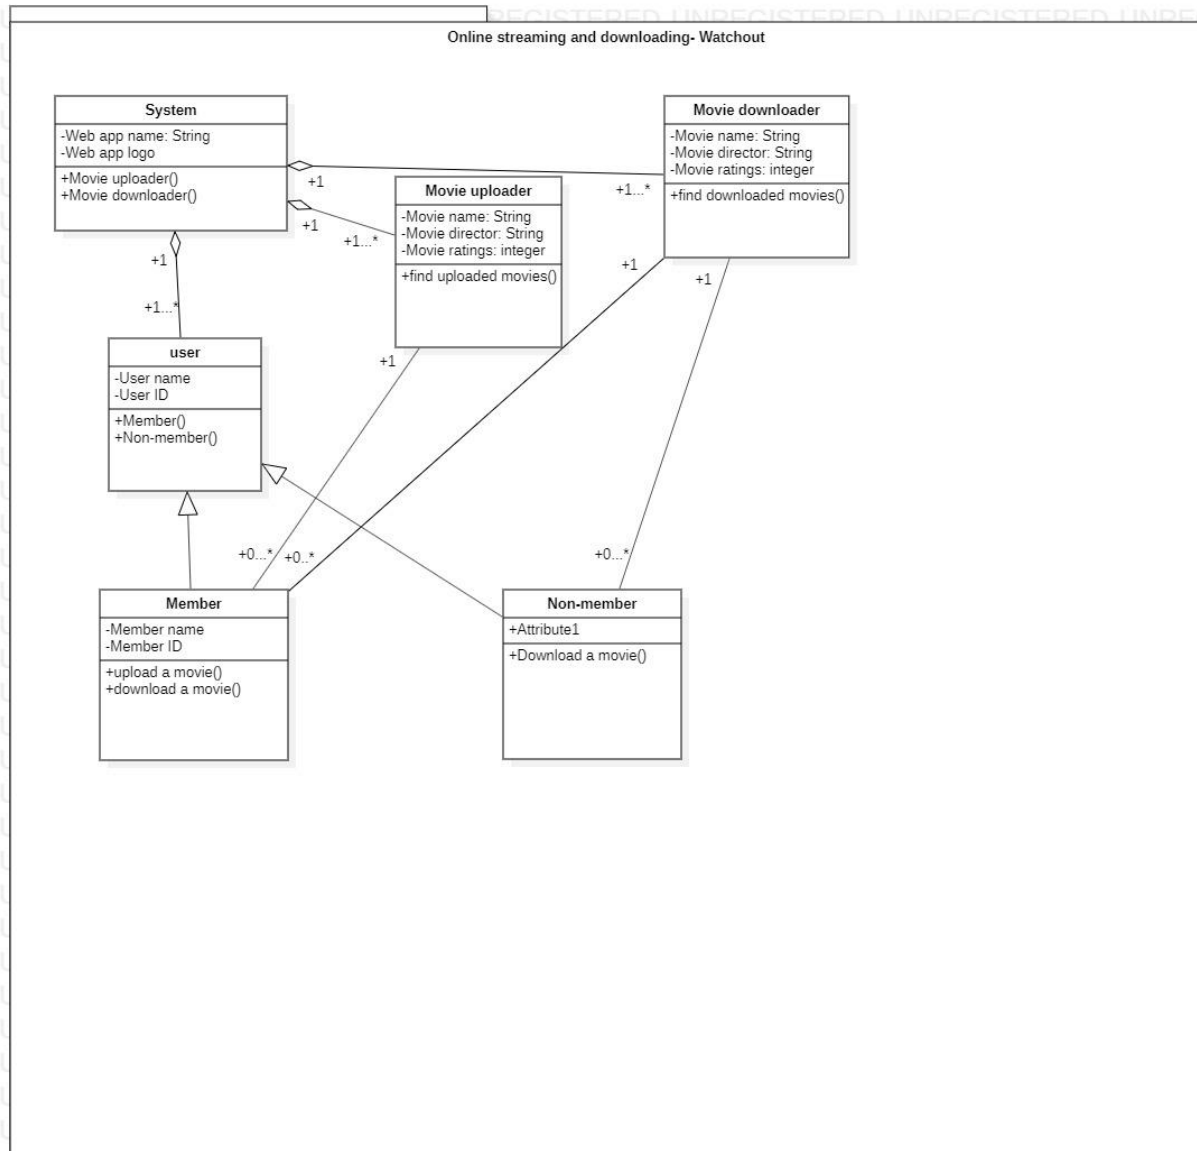

Figure 2 Class diagram

Working in group increases our communication skills and division on task helps us to plan and manage time. Hence, Drawing required UML diagrams and explaining them are my contribution on our project till date.
